

## HOW TO ORDER YOUR Nixdorf Personal Computer Language Modules ...

The NIXDORF LK-3000 Personal Computer is also a language translator.

The LK-3000 is a foreign travelers friend and personal interpreter. Its vocabulary is especially useful and contains almost every basic word or phrase needed to ask directions, order meals, converse, etc. Even if you've never had any experience with languages, the simple instruction manual, interactive keyboard, and L.E.D. display will make easy translation from English to any of 11 different foreign languages or vice versa. For the student, the LK-3000 and your choice of 11 different language modules will provide a solid basis for continued study and eventual mastery of a second language.

Now for a limited time only you may select your choice of the following language modules:
